Floodwaters

# ΚΑΤΑΚΛΥΣΜΟΣ

Flood - (kat-ak-looce-mos') - is where we get our English word Cataclysm. And it means a deluge, Inundation, specifically Noah's deluge.

**בְּרִית**

# Males Y Chromosome

All human males have the sex chromosomes X and Y. They all inherit their Y chromosome from their biological father. This means that Noah's three sons all inherited their Y Chromosomes from their father Noah.

So barring any mutations, there is only one type of Y Chromosome on the Ark. Thus all men, ever since Noah, have inherited that one Y Chromosome. So we would expect to find that the Y Chromosome in all men on the earth today to be very similar.

For evolutionists they would say there would be mutations since the flood 4,500 years ago and so the Y Chromosome would show some differences, yet this is not what we find.

**Instead we find all Y Chromosomes in men are similar and no mutated or highly divergent Y chromosome has been found among men on the earth. Thus proving we all came from Noah. ( pg 553, Jonathan Sarfati, The Genesis Account)**

**Other Y Chromosome research shows that Jews and Arabs around the world are closely related, in a manner consistent with both ethnic groups coming from the sons of Abraham, Isaac and Ishmael. (pg 386, Jonathan Sarfati, The Genesis Account)**

Also Mitochondria that wonderful little DNA molecule is inherited by from our mothers only, not from the fathers. The evidence is consistent with all of us coming from a single female ancestor, Eve. Evolutionist even call this Mitochondrial Eve.

However, the Ark brings about a refinement. There are only 3 Mitochondria DNA lineages that could have survived the Ark. Given that we do not read Mrs Noah having anymore Children after the Ark we can conclude she does not pass on any

**Mitochondria DNA which leaves us with Noah's three daughter in laws.**

**Interesting that there are only 3 main Mitochondria DNA lineages around the world. The Evolutionist call these lines "M", "N", "R" which is consistent with the three lines from Noah's daughter in laws.**
